The Third Play

# chhenra collage

(A collage torn)

Chhenra Collage is a play about Nandini, Nikhil, their family and friends. An unexpected turn of events lend a different perspective to these characters and reveal them in a different light. All these roles form a collage which is representative of the modern milieu.

The cracks in the Collage might have been inherent or it might be the handiwork of the events leading to. It for you to judge whether the collage falls apart or survives. Join us folks as we delve into the intricacies of human relationships / behaviors in a gamut of situations, in the play Chhenra Collage.
